

Kandu's Do it Yourself Magic Wand KIT

A great opener for any magic show!

A gift bag is brought out and set on the floor and the parts for a magic wand are removed.

In an attempt to put the magic wand together any or all of these things happen...

- 1. The wand tip changes color from plain wood to white.**
- 2. The wand tip wiggles and falls off (not enough glue) then the other one falls off.**
- 3. The glue bottle sticks to your hand (oops, too much glue).**
- 4. The black part sticks to your pants (a very funny sight gag).**
- 5. In disgust, you throw the wand pieces into the bag.**
- 6. Apologizing to the children for losing our temper, you ask for their help.**

The magic words are yelled and the finished wand comes flying high into the air so

you can get on with the show!

The trick comes with the wand launcher made of birch plywood, bag with 2 removable PVC side pieces that hold the bag open and hold the wand pieces, the gimmicked glue bottle, special wand that is magnetic, 2 super strong magnet packs for your pocket and sleeve, the instructions, and the regular wand.
