THE MAGIC OF ELFVIS

Created by Jef Eaton

Did you ever wonder what happens when Santa forgets to drop off
a present at someone's house?

Or one falls off the sleigh and gets lost?

Well, he calls on his "go to" guy Elfvis!

This elf knows magic and can get Santa off the hook in case something happens.

Let's use these two Christmas stockings to show you how Elfvis works.

The picture of a present is placed in one of the stockings
and it is closed and handed to a child to hold. The other stocking is shown empty, closed,
and handed to another child.

Elfvis will perform his magic and get the present to jump from one to the other, just like when he has to
get a present to a child using his magic.

After looking in the 2nd stocking (but not showing it to the audience) it is closed back up
and you state that "the hard part is to get it to go back."

I know that is an old old joke, but it still gets a laugh. The magic is reversed, and you take out
the present from the 1st stocking.

Obviously, the kids are not impressed so you offer to do it again. The same motions are made
but this time the present jumps from one stocking to the other by magic!

Comes complete with 2 stocking purses, the custom Wonder Inagery Silk, the secret gimmick made by Vernet,
plus the PDF files to print and laminate your own picture of Elfvis.
